SUMMARY

Senior Full Stack Engineer with 9+ years of experience. I shipped multiple products from scratch including B2B and B2C SaaS. I have 4 years of experience with Data Analytics and Business Intelligence, creating custom visualization plugins for MicroStrategy, PowerBI and ThoughtSpot, that deal with hundreds of thousands of rows of data with zero performance issues. I also worked as a cyber security researcher, recognized by large companies like Google, Meta and Microsoft.

TECHNICAL SKILLS

- **AI & Automation:** AI assistants, Autonomous workflows, OpenAI integrations, MCP-based bots, Voice assistants, Vector DBs.
- **Infrastructure & Backend:** Node.js, Express.js, Fastify, GraphQL, Firebase, Google Cloud, MongoDB, Postgres, SQLite, Solidity, WebSocket
- **System Architecture:** Modular Design, Platform Independent Tooling, API Design, Secure Workflows.
- **Security:** OWASP Top 10, Backtrack & Kali Linux.
- **Frontend:** Angular, TypeScript, JavaScript, NgRx, RxJS, Angular Material, SSR, LESS, SASS, Highcharts, jQuery, Bootstrap, HTML5, CSS3, Flutter, Tailwind.
- **Tools & DevOps:** Git, Webpack, CircleCI, GitHub Actions, NPM

PROFESSIONAL EXPERIENCE

Full Stack Developer

Self Employed | August 2025 - present

- **Built Layerize.** A SaaS that converts images into depth aware layers using on-device AI models via WebGPU and export them as PSD and PNG files.
- **Built Gradual Alarm.** An alarm clock for android, that slowly guides the user from deep sleep to light sleep and then wakes them up.

Senior Software Developer

Vitara Information Technologies Pvt Ltd | Aug 2021 - May 2025

- **Architected and delivered** a complete redesign of the Vitara Property Editor into a **platform-independent, TypeScript-based infrastructure layer**, enabling the same codebase to run across multiple BI environments (MicroStrategy, ThoughtSpot).
- **Owned AI integrations** including a voice-driven chart assistant and a context-aware MCP bot. Designed workflows, integrated APIs, built fast prototypes, and iterated based on user feedback.
- Built an internal **automation pipeline** connecting Slack and Freshdesk, enabling seamless ticket creation, file handling, and context sharing, reducing operational overhead.

- **Collaborated directly with product, engineering, support, and customer-success** teams to shape technical decisions, solve cross-system constraints, and deliver stable high-impact features.
- Improved system reliability and developer velocity by spearheading the company-wide **JavaScript to TypeScript migration**, establishing coding standards, and onboarding engineers.
- Enhanced data workflows by building custom D3/Highcharts components and improving data-processing layers.
- Delivered internal demos, security briefings, and architectural walkthroughs across teams.

Cybersecurity Researcher & Full Stack Developer (FEAN/MEAN)

Self Employed | Jan 2018 - Jul 2021

- **Owned full product cycles** for global clients (Aus, Canada, Middle East): requirement gathering, architecture, development, deployment, and iteration.
- Built tools and applications using Node.js, GraphQL, Flutter, Firebase, and TypeScript while coordinating directly with stakeholders, often acting as both engineer and product owner.
- Experimented with **smart contracts, Web3 workflows, and dApp prototypes**.
- Reported multiple security vulnerabilities to companies like Google, Facebook, and Microsoft under responsible disclosure.
- Published technical blogs

Associate Software Engineer

Hakuna Matata Solutions Pvt Ltd | Jan 2017 - Oct 2017

- Co-developed a drag-and-drop static website builder using Angular, enabling clients to create static websites, downloadable as ZIP.
- Delivered multiple interactive web games using Angular for Middle Eastern clients, showcasing complex DOM/UI manipulation skills.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Science

JCT College of Engineering & Technology (Anna University, Chennai) | 2013 - 2017

PROJECT HIGHLIGHTS

- **Layerize:** A SaaS that converts flat images into depth aware layers and export them as Photoshop document (PSD) and PNG files.
- **Gradual Alarm:** An alarm clock for android, that slowly guides the user from deep sleep to light sleep and then wakes them up.
- **AI Voice Chart Assistant:** Autonomous voice-controlled agent for chart customization, integrating LLMs, speech interfaces, vectorDB and workflow logic.
- **AI Support Bot:** Context-aware agent using Anthropic MCP for handling queries and automating support operations.
- **Slack-Freshdesk Integration:** Payment-like workflow routing messages, files, and metadata across multiple systems.
- **Cross-Platform Visualization Framework:** Infrastructure layer powering MicroStrategy & ThoughtSpot extensions.
- **Drag-and-Drop Angular Site Builder:** WYSIWYG editor for static websites (Hakuna Matata)
